Built on Experience. Supported by Expertise

Professional scaffolding solutions for domestic, commercial and specialist projects

SILVERCREST SCAFFOLDING

About Silvercrest Scaffolding

Established in 2011, Silvercrest Scaffolding has grown into an experienced scaffolding contractor delivering solutions for projects of all sizes, from residential renovations to complex commercial developments.

Operating from our 16,000 sq ft yard in Basildon, Essex, we combine an extensive stockholding, experienced management team and skilled workforce to deliver dependable scaffolding solutions tailored to the requirements of each project.

We work alongside developers, principal contractors, construction companies, architects, builders and private clients, providing a complete service from initial consultation and scaffold design through to installation and dismantling.

Our approach is built around three core principles: safety, reliability and delivering a high standard of workmanship.

Commercial Scaffolding

The capability to deliver.
The experience to get it right.

From large-scale construction developments to complex refurbishment and specialist access projects, Silvercrest Scaffolding has the resources, experience and technical knowledge to support demanding commercial environments.

We understand the importance of programme delivery, coordination and maintaining safe working environments. Our team works closely with contractors, project managers and other construction professionals to develop practical scaffolding solutions that meet the requirements of each site.

Our commercial capabilities include:

- Multi-storey developments.
- Industrial and factory buildings.
- Schools and educational facilities.
- Retail and shopping centres.
- Churches and heritage properties.
- Refurbishment and renovation projects.
- Temporary roof structures.
- Specialist access scaffolding.

Domestic Scaffolding

Professional scaffolding solutions for homes of every size.

Whether supporting a roof replacement, property extension, chimney repair or major renovation, Silvercrest Scaffolding provides practical and reliable scaffolding solutions for residential projects.

We understand that working on someone's home requires careful planning, consideration and attention to detail. Our team works to minimise disruption while ensuring safe and suitable access for the trades carrying out the work.

From straightforward residential scaffolds to more complex bespoke structures, we deliver solutions designed around the property and the work being undertaken.

SILVERCREST SCAFFOLDING

Our Approach

From initial planning to project completion.

Every project starts with understanding what is required. We work with our clients to establish the scope, identify site-specific considerations and determine the most appropriate scaffolding solution.

Our process encompasses:

1. Consultation & Planning – Understanding project requirements, site conditions and programme expectations.
2. Design & Assessment – Developing suitable scaffolding arrangements and assessing associated risks.
3. RAMS - Site-specific risk assessments and method statements (RAMS) are prepared for each project, reviewed with relevant parties and agreed before work commences.
4. Installation – Skilled operatives deliver the agreed scaffold installation.
5. Project Support – Working alongside clients and site teams throughout the project.
6. Dismantling – Safe and organised removal upon completion.

Skilled People Behind Every Project

Health & Safety

Safety is fundamental to everything we do.

At Silvercrest Scaffolding, health and safety is central to our planning, operations and project delivery.

We undertake risk assessments and prepare method statements to ensure that work is appropriately planned and carried out in accordance with project requirements.

Our operatives hold relevant CITB/CSCS credentials, and we maintain both internal and external health and safety support.

We are committed to providing safe working environments for our workforce, clients, contractors and members of the public.
